 - Sales Representative
 - HR Officer
 - System Administrator
 5. Kenya-Specific Configurations
 6. Go-Live Checklist
 7. First 30 Days Guide
 8. Common Questions (FAQ)
 9. Support Contacts
-

1. Welcome & Getting Started

Congratulations on going live with FMCG ERP!

This manual is your first guide. It does not cover every feature — it covers what you need to know to start working effectively from Day 1.

What this system does for your business:

- Replaces manual Excel-based ordering, stock tracking, and payroll
- Connects all departments so everyone sees the same real-time data
- Provides automated compliance (eTIMS for KRA, NSSF, NHIF)
- Gives management instant visibility into business performance

House rules for the system:

1. Never share your password with anyone
2. Log out when leaving your desk
3. If you make a mistake, do not delete — speak to your supervisor
4. If something looks wrong, raise a Helpdesk ticket — do not try to fix it yourself

2. Logging In

The ERP login page.

URL: `http://[your-company-erp-address]/login`

Steps:

1. Open Chrome or Edge (do not use Internet Explorer)
2. Type the ERP URL in the address bar
3. Enter your email address (given to you by IT)

4. Enter your password (given to you by IT at training)
5. Click **Sign In**

First login: You will be prompted to change your password.

Forgot password: Click "Forgot password?" on the login page → enter your email → check your inbox for a reset link.

Account locked? Contact IT or your System Administrator — your account locked after 5 wrong password attempts.

3. Navigating the ERP

Main dashboard after login.

The Left Sidebar

The left sidebar contains all the modules you have access to. If you don't see a module, your role doesn't have access — contact your administrator.

Common sidebar items:

Sidebar Item	What you'll find there
Dashboard	Home screen with KPIs
Procurement	Purchase requests and orders
Inventory	Stock management
Production	Work orders and planning
Quality	QC inspections
Sales	Customer orders and invoicing
Finance	Accounts, cashbook, payroll
HR	Employee records and leave
Documents	Document library
Helpdesk	Raise a support ticket
Approvals	Items waiting for your approval

The Top Navigation

- **Bell icon** — notifications (approvals waiting, alerts, system messages)
- **User icon (top right)** — your profile, logout, settings
- **Search bar** — search across all modules

Tabs within a Module

Most modules have multiple tabs at the top. Click a tab to switch section. Your current tab is underlined.

Common Buttons

Button	Meaning
+ New [Item]	Create a new record
Save	Save changes
Submit	Submit for approval
Approve	Approve a pending request
Export	Download as Excel or PDF
Filter	Narrow down the list

4. Role-Based Quick Start Guides

Procurement Officer

Your daily job in ERP:

Morning:

1. Check **Approvals** → any approved PRs to convert to POs?
2. Check **Procurement** → **Deliveries** → any expected deliveries today? Confirm receipt when supplier delivers.
3. Check **Procurement** → **Suggestions** → any reorder alerts?

Creating a Purchase Requisition:

1. Procurement → + **New Request**
2. Fill in: Item, Quantity, Required Date, Priority, Department
3. Click **Submit** → goes to your manager for approval

Receiving Goods from a Supplier:

1. Procurement → Deliveries → find the expected delivery
2. Click **Receive**
3. Enter actual quantities received (can be less than ordered)
4. Record batch numbers if required
5. Click **Confirm Receipt**

What to do if a supplier delivers the wrong item:

1. Do NOT accept the wrong goods into the system
2. Record a discrepancy on the delivery
3. Contact supplier immediately
4. Raise a Helpdesk ticket if unsure how to handle

Finance / Accountant

Your daily job in ERP:

Morning:

1. Check **Approvals** → any journals or invoices to approve?
2. Check **Finance** → **Receivables** → any overdue invoices to follow up?
3. Check **Finance** → **eTIMS** → any failed submissions to fix?

Posting a Journal Entry:

1. Finance → Accounting → **+ New Journal**
2. Set date and reference
3. Add debit lines and credit lines (must balance)
4. Click **Save Draft**
5. When ready, click **Submit for Approval**

Reconciling Bank:

1. Download statement from your bank
2. Finance → Bank Reconciliation → **Import Statement**
3. Review auto-matched items (green)
4. Match remaining items manually
5. Post any bank charges as journals
6. Close period when complete

Running Payroll:

1. Finance → Payroll → **New Payroll Period**
 2. Select month and year
 3. Click **Generate**
 4. Review exceptions
 5. **Approve → Post → Pay**
-

Production Manager**Your daily job in ERP:****Morning:**

1. Check **Production → Plans** → any plans to confirm today?
2. Check **Production → Work Orders** → any work orders to release to shop floor?
3. Check **Production → OEE** → last shift OEE performance
4. Check **Approvals** → any work orders awaiting your approval?

Creating a Production Plan:

1. Production → Plans → **+ New Plan**
2. Set name, dates, and products
3. Add work orders (or they'll be added individually)
4. Click **Confirm Plan**

Releasing a Work Order:

1. Production → Work Orders → find CONFIRMED work order
2. Click **Release** → status changes to RELEASED
3. Work order now visible on Shop Floor terminal

Handling a Breakdown:

1. Shop Floor → Breakdowns → **+ Log Breakdown** (or let maintenance log it)
 2. Notify Maintenance team
 3. Update production plan if schedule affected
-

Quality Officer**Your daily job in ERP:****Morning:**

1. Quality → Inspections → filter by Status = PENDING
2. Complete pending inspections
3. Check Quality → Consumer Complaints → any new complaints?

Creating an Inspection:

1. Quality → Inspections → **+ New Inspection**
2. Select inspection type, product, batch
3. Set inspector and scheduled date
4. Click **Save**

Recording Inspection Results:

1. Open the inspection
2. Enter test results against each parameter
3. If all within spec → set Decision = **PASS**
4. If outside spec → set Decision = **FAIL** → system creates non-conformance record
5. Submit

What to do if QC fails:

1. Immediately quarantine the batch (Inventory → WMS → Quarantine)
 2. Notify Production Manager
 3. Complete the Non-Conformance Report in Quality
 4. Await disposition decision (rework / reject / accept with deviation)
-

Warehouse / Store Keeper

Your daily job in ERP:

Morning:

1. Inventory → Stock → check stock levels for items flagged low
2. WMS → Quarantine → any items to release after QC clearance?
3. Check pending deliveries for today

Receiving Goods:

1. Procurement → Deliveries → find your delivery
2. Count physical goods against delivery note
3. Record quantities and batch numbers in ERP
4. Click **Confirm Receipt**
5. Put away stock in correct bin location
6. Update WMS → Locations if manually tracking bins

Issuing Stock to Production:

1. Inventory → Issue tab → + **New Issue**
2. Select material, quantity, and work order reference
3. Confirm → stock reduces immediately

Doing a Stock Count:

1. Inventory → Cycle Count → find your assigned count
2. Print count sheet
3. Physically count items
4. Enter actual counts in ERP
5. Submit for review (supervisor approves adjustment)

Sales Representative

Your daily job in ERP:

Morning:

1. Sales → Orders → filter by your name as Sales Rep
2. Check status of pending orders — any to confirm or dispatch?
3. CRM → Activities → what follow-ups are due today?

Creating a Sales Order:

1. Sales → Orders → + **New Order**

2. Select customer (must exist in system)
3. Set delivery date and payment terms
4. Add product lines with quantities
5. Click **Confirm Order**

Checking Available Stock Before Promising Delivery: Before confirming a date, check:

- Inventory → Stock → Available column for the product
- Available = On Hand minus Reserved

Creating a Quote:

1. Sales → Quotes → **+ New Quote**
2. Fill in customer, products, prices, and expiry date
3. Save and email to customer
4. When customer accepts → **Convert to Order**

HR Officer

Your daily job in ERP:

Morning:

1. HR → Attendance → record today's attendance (or confirm biometric import)
2. HR → Leave → check pending leave requests for approval

Adding a New Employee:

1. HR → Employees → **+ New Employee**
2. Fill all required fields: Name, ID, KRA PIN, NSSF, NHIF, Department, Start Date
3. Save
4. Create payroll profile in Finance → Payroll → Profiles

Processing Leave:

1. HR → Leave → **+ New Leave** (or employee submits via ESS)
2. Verify days against leave balance
3. Click **Submit** → goes to line manager for approval

Monthly Attendance Summary:

1. HR → Attendance → filter by month
2. Export to Excel
3. Share with Payroll Officer for deduction calculation

System Administrator

Your daily job in ERP:

Morning:

1. Admin → Logs → Security → check for failed login spikes
2. Admin → Users → any locked accounts to unlock?
3. Finance → eTIMS → any failed submissions from yesterday?

Creating a New User:

1. Admin → Users → **+ New User**
2. Enter email, name, role
3. Send welcome email with temporary password
4. Ask user to change password on first login

Troubleshooting "I can't see X" Reports:

1. Admin → Users → find user
2. Check their role
3. Admin → Permissions → check that role has the required permission
4. If missing → add the permission → save
5. Ask user to log out and back in

5. Kenya-Specific Configurations

eTIMS (KRA Electronic Tax Invoice)

All customer invoices must be submitted to KRA via eTIMS. The ERP does this automatically when you post a sales invoice.

For this to work:

- Each customer must have a valid KRA PIN in their profile
- Finance → Integrations → eTIMS must be configured with your TIMS credentials

If eTIMS submission fails:

1. Finance → eTIMS tab
2. Find rejected invoice
3. Check error code (E001 = bad PIN, E002 = description too long, etc.)
4. Fix the issue
5. Click **Resubmit**

PAYE Calculation

The ERP calculates PAYE using Kenya's graduated tax bands as per KRA. Ensure:

- Each employee's KRA PIN is entered
- Employee tax relief (personal relief KES 2,400/month) is set in payroll profile
- Pension contributions entered if applicable

NSSF & NHIF/SHIF Contributions

Updated rates apply automatically. Verify in Finance → Payroll → Settings that rates match the current gazette rates.

VAT (16%)

VAT is 16% standard rate in Kenya. Zero-rated categories (exports, basic foodstuffs) must be configured in the product master with the correct VAT code.

6. Go-Live Checklist

Week Before Go-Live

- ☐ All users created and passwords communicated
- ☐ Roles and permissions configured and tested
- ☐ Opening balances entered (stock, AR, AP, bank)
- ☐ Customer master data imported and verified
- ☐ Supplier master data imported and verified
- ☐ Product and materials master data imported
- ☐ Price lists configured
- ☐ Chart of accounts configured
- ☐ eTIMS credentials configured and tested
- ☐ M-Pesa integration configured and tested
- ☐ Approval chains configured
- ☐ Users trained on their specific role workflows
- ☐ Parallel run completed (manual + ERP simultaneously)

Go-Live Day

- ☐ Data migration complete and verified
- ☐ All users able to log in
- ☐ First live transactions created and confirmed
- ☐ IT support on standby for Day 1

- ☐ Escalation contact list shared with all department heads
- ☐ Backup confirmed for that night

Week 1 After Go-Live

- ☐ All daily workflows running through ERP
- ☐ No critical issues unresolved
- ☐ First week report reviewed with management
- ☐ Helpdesk tickets triaged and responded to

7. First 30 Days Guide

Period	Focus
Days 1–5	Core transactions only — orders, GRNs, invoices
Days 6–10	Payroll set up; first payroll run reviewed
Days 11–15	Quality inspections workflow bedded in
Days 16–20	First month-end bank reconciliation
Days 21–25	Reports and analytics reviewed with managers
Days 26–30	VAT return prepared; eTIMS audit; lessons learned session

Common issues in first 30 days and fixes:

Issue	How to handle
Supplier doesn't exist in system	Add supplier before raising PO
Customer invoice bouncing on eTIMS	Check KRA PIN; update and resubmit
Stock balance wrong	Check opening balances; may need adjustment
User can't find their module	Check role — may need permission added
Payroll amount incorrect	Check payroll profile — verify salary and deductions

8. Common Questions (FAQ)

Q: Can I undo an action in the ERP?

A: Depends on the action. You can edit DRAFT documents before posting. Posted journals require a reversal entry — do not delete. Contact Finance Manager or raise a Helpdesk ticket.

Q: The system is slow — what do I do?

A: Check your internet connection first. If internet is fine, raise a Helpdesk ticket with the time it happened and what you were doing.

Q: I entered the wrong quantity on a goods receipt — can I fix it?

A: If not yet confirmed: edit the delivery record. If already confirmed: contact your Warehouse Manager — a correction entry must be made.

Q: Someone else can see my sensitive data — is that right?

A: Contact your System Administrator. Role permissions may need adjusting.

Q: The month is over — can I still post a transaction last month?

A: Depends on whether the period is closed. Contact Finance — they control period closure. Do not try to post backdated entries without Finance approval.

Q: How do I print from the ERP?

A: Open the document (invoice, PO, etc.) → click **Print** or **Export to PDF** → print from your browser.

9. Support Contacts

Internal IT Helpdesk:

- Route: Helpdesk module (in the ERP left sidebar)
- Email: it@[company].co.ke
- Phone: [internal extension]

ERP System Administrator:

- Name: [Admin name]
- Email: [admin email]
- Available: Monday–Friday 8am–5pm

Finance Queries:

- Contact your Finance Manager for eTIMS, payroll, and tax questions

Emergency (system down):

- Contact IT Manager directly: [mobile number]
