

FMCG ERP SYSTEM

FMCG ERP Supply Chain Manual

Procurement · Inventory · Warehousing · WMS

Audience: Procurement Officers, Warehouse Supervisors, Logistics Staff

Version: v2.0 — Post-Recovery Edition

Date: 24 May 2026

Status: Confidential — Internal Use Only

ERP button/link recovery complete. All navigation targets restored and verified. Smoke test: 141/141 routes passed. BVT: 0. Broken action cards: 0.

FMCG ERP — Supply Chain Manual v2

Version: 2.0 (post-recovery)

Date: 2026-05-24

Audience: Procurement Officers, Warehouse Managers, Inventory Controllers, Logistics Coordinators

Modules Covered: Procurement · Suppliers · Inventory · Warehouses · WMS · Logistics

Table of Contents

1. Module Overview
 2. Procurement
 3. Suppliers
 4. Inventory Management
 5. Inventory Movements
 6. Cycle Count
 7. Shelf Life Management
 8. Warehouses
 9. WMS (Warehouse Management System)

1. Module Overview

What it does: Manages the full inbound supply chain — from purchase requisitions through supplier management, goods receipt, inventory control, warehouse operations, and outbound logistics.

Who uses it:

- Procurement Officer — raises purchase requisitions and purchase orders, manages RFQs
- Warehouse Manager — controls warehouse zones, locations, and stock movements
- Inventory Controller — monitors stock levels, cycle counts, shelf life
- Logistics Coordinator — tracks shipments, fleet, and delivery schedules

When to use it:

- When reordering raw materials or packaging
- When receiving goods from suppliers
- When performing a physical stock count
- When managing warehouse locations and pick waves
- When tracking inbound/outbound shipments

Modules at a glance:

Module	Route	Purpose
Procurement	/dashboard/procurement	PRs, POs, RFQs, deliveries
Suppliers	/dashboard/suppliers	Supplier master and performance
Inventory	/dashboard/inventory	Stock levels and movements
Warehouses	/dashboard/warehouses	Warehouse configuration
WMS	/dashboard/wms	Zones, locations, pick waves
Logistics	/dashboard/logistics	Shipments and fleet

Procurement module overview.

2. Procurement

Route: `/dashboard/procurement`

Required permission: `procurement.view`

What it does

Full procurement lifecycle: purchase requisitions → purchase orders → goods receipt → supplier invoicing. Includes RFQs, blanket agreements, auto-reorder suggestions, subcontracting, and landed cost.

Tabs

Tab	Purpose
Purchase Requests	Internal purchase requisitions
Orders	Purchase orders sent to suppliers
RFQ	Request for Quotation
Deliveries	Goods receipt and delivery tracking
Suppliers	Quick supplier lookup
Blanket Agreements	Framework contracts with volume commitments
Reorder Policies	Min/max reorder rules per item
Suggestions	AI/rule-based reorder suggestions
Subcontracting	Outsourced production orders
Landed Cost	Import duty and freight allocation
Supplier Portal	External portal access management

Purchase Requests tab showing all PRs with status, requester, and priority.

Creating a Purchase Requisition

Click + New Request:

Field	Required	Notes
Item	Yes	Product or material to purchase
Quantity	Yes	Required quantity
Unit	Yes	UOM
Required By Date	Yes	Needed-by date
Priority	Yes	Low / Medium / High / Critical
Department	Yes	Requesting department
Notes	No	Free text justification

PR Status Flow: DRAFT → SUBMITTED → APPROVED → PO_CREATED → CLOSED

After approval, PR can be converted to a Purchase Order (click **Create PO** on the PR detail).

Purchase Orders Tab

Purchase Orders tab — all POs with supplier, value, and delivery status.

Creating a Purchase Order:

New Purchase Order

PO No * Currency

Supplier *

Order Date * Expected Delivery *

Payment Terms

Order Lines Qty

Field	Required	Notes
Supplier	Yes	Select from approved suppliers
Order Date	Yes	Date of order
Required Delivery Date	Yes	Expected delivery
Payment Terms	Yes	e.g. NET30, COD
Currency	Yes	KES, USD, EUR, etc.
Delivery Location	Yes	Destination warehouse
Line Items	Yes	Product, qty, unit price per line

PO Status Flow: DRAFT → SENT → ACKNOWLEDGED → PARTIAL_DELIVERY → DELIVERED → INVOICED → CLOSED

RFQ Tab

Request for Quotation — send RFQ to multiple suppliers and compare responses.

Creating an RFQ:

1. Create RFQ with item list
2. Select suppliers to invite (multi-select)
3. Set response deadline
4. System sends email invitations
5. Suppliers respond via portal or manual entry
6. Compare quotes side-by-side → award to winning supplier → auto-creates PO

Delivery Planning
Inbound schedule, overdue POs, and shortage alerts

Overdue POs
0

Expected (next 30d)
0

Without Shipment
0

Inbound Schedule Days ahead: 30

PO NO	SUPPLIER	EXPECTED DELIVERY	STATUS	SHIPMENT	VALUE
No active POs due within this period.					

Deliveries — expected and received goods, GRN creation, discrepancy reporting.

Goods Receipt workflow:

1. Select pending delivery from list
2. Enter received quantities per line (can be partial)
3. Record batch/lot numbers if applicable
4. Confirm receipt → creates Goods Receipt Note (GRN)
5. GRN triggers inventory increase and supplier invoice matching

Blanket Agreements Tab

Blanket agreements — framework contracts with committed volumes and pricing.

Reorder Policies Tab

Reorder policies — set min/max stock levels and reorder quantities per item-location.

Field	Required	Notes
Item	Yes	Material or product
Location	Yes	Warehouse/location
Min Stock	Yes	Reorder trigger level
Max Stock	Yes	Order-up-to level
Reorder Qty	Yes	Fixed quantity per order
Supplier	No	Preferred supplier
Lead Time (days)	No	Supplier lead time

Suggestion List Grouped Orders Supplier Prices AI Recommendations

Auto-generated reorder suggestions based on policies, MRP, and demand forecast.

Click **Generate Suggestions** to refresh. Review and approve to convert to PRs.

Subcontracting Tab

Subcontracting orders — send components to external processor, receive finished goods.

Landed Cost Tab

Landed cost allocation — distribute import duty, freight, and insurance across PO lines.

Allocation methods: By Value / By Weight / By Volume / By Qty / Equal

Supplier Portal Tab

Manage external supplier portal access credentials and permissions.

3. Suppliers

Route: `/dashboard/suppliers`

Required permission: `suppliers.view`

What it does

Supplier master data management — contact details, payment terms, certification status, and performance tracking.

Suppliers list with name, category, rating, and status.

Adding a Supplier

Click + Add Supplier:

Field	Required	Notes
Supplier Name	Yes	Legal entity name
Category	Yes	Raw Material / Packaging / Service / Utility
Contact Person	Yes	Primary contact name
Email	Yes	Primary email
Phone	No	Primary phone
Country	Yes	Country of operation
Payment Terms	Yes	Default terms for this supplier
Currency	Yes	Transaction currency
Tax/VAT Number	No	Registration number
Bank Details	No	For payment processing
Rating	No	1–5 star performance rating
Notes	No	Free text

Required Before First PO

- Supplier must be created and status set to **Active**
- Payment terms and currency must be set
- At least one contact email required (for PO delivery and RFQ invitations)

4. Inventory Management

Route: `/dashboard/inventory`

Required permission: `inventory.view`

What it does

Real-time stock visibility — current stock levels by product, location, batch, and lot. Entry (receipts), issues (consumption), and transfers.

Inventory Stock Tab

Current stock tab — item, location, quantity on hand, reserved, available.

Columns:

Column	Description
Item	Product/material name and SKU
Location	Warehouse and bin location
On Hand	Physical quantity in stock
Reserved	Quantity allocated to work orders or sales orders
Available	On Hand minus Reserved
Unit	UOM
Batch/Lot	Batch number if tracked
Expiry	Best-before/expiry date if tracked

Stock Entry Tab

Stock entry — manual stock receipt not linked to PO (adjustments, opening balances).

Field	Required	Notes
Item	Yes	Product or material
Location	Yes	Destination location
Quantity	Yes	Quantity to add
Unit	Yes	UOM
Reference	No	Internal reference or document number
Batch/Lot	No	Batch number
Expiry Date	No	For shelf-life tracked items
Notes	No	Reason for entry

Stock Issue Tab

The screenshot shows the 'Inventory' section of the POVU ERP system. The left sidebar contains a navigation menu with options like Dashboard, Supply Chain, Products, Materials, Suppliers, Inventory (selected), Warehouses & WMS, Procurement, Manufacturing, Commercial, Finance, Factory Operations, Logistics, HR & Payroll, Documents & Comm..., Intelligence, and Administration. The main area is titled 'Inventory' with a subtitle 'Stock ledger, movements, cycle counts, shelf life, traceability'. Below this are tabs for 'Stock Ledger', 'Movements', 'Cycle Count', 'Shelf Life', 'Traceability', 'Serials', and 'Valuation'. The 'Stock Ledger' tab is active, showing '0 stock positions'. There are buttons for 'Import CSV' and 'Refresh'. Below the tabs are four buttons: 'Current Stock', 'Stock Entry (IN)', 'Stock Issue (OUT)' (highlighted), and 'Transfer'. The 'Stock Issue (OUT)' form is displayed, featuring fields for 'Product *' (a dropdown menu), 'Warehouse *' (a dropdown menu), 'Quantity *' (a text input), 'Lot Number (optional)' (a text input with 'LOT-2026-001'), 'Reference # *' (a text input with 'SO-2026-05-19'), and a 'Notes' section.

Stock issue — record consumption or removal from stock.

Use for: material consumption not triggered by production order, samples, damaged stock write-off.

Stock Transfer Tab

The screenshot shows the 'Inventory' section of the POVU ERP system, similar to the previous one. The left sidebar is the same. The main area is titled 'Inventory' with the same subtitle and tabs. The 'Stock Ledger' tab is active, showing '0 stock positions'. There are buttons for 'Import CSV' and 'Refresh'. Below the tabs are four buttons: 'Current Stock', 'Stock Entry (IN)', 'Stock Issue (OUT)', and 'Transfer' (highlighted). The 'Transfer' form is displayed, featuring fields for 'Product *' (a dropdown menu), 'From Warehouse *' (a dropdown menu), 'To Warehouse *' (a dropdown menu), 'Quantity *' (a text input), 'Lot Number (optional)' (a text input), 'Reference # *' (a text input with 'TRF-2026-05-19'), and a 'Notes' section.

Inter-warehouse or inter-location stock transfer.

Field	Required
From Location	Yes
To Location	Yes
Item	Yes
Quantity	Yes
Transfer Date	Yes

5. Inventory Movements

Route: </dashboard/inventory/movements>

What it does

Full transaction history of every stock movement — entries, issues, transfers, production consumption, goods receipts.

All inventory transactions with date, type, item, quantity, and reference.

Filter by: Date range, Movement Type, Item, Location, Reference

Movement types:

Type	Trigger
RECEIPT	Goods receipt from PO delivery
ISSUE	Manual issue or production consumption
TRANSFER	Location-to-location move
ADJUSTMENT	Manual correction
RETURN	Supplier return or customer return
WRITE_OFF	Disposal of expired or damaged stock

6. Cycle Count

Route: `/dashboard/inventory/cycle-count`

Required permission: `inventory.view`

What it does

Physical stock count management — schedule counts, record actual quantities, generate variance reports, and approve adjustments.

Cycle count dashboard showing count schedule, pending counts, and variance summary.

Cycle Count Workflow

1. **Schedule count** — select location(s) and items to count
2. **Print count sheet** — blind sheet (no expected quantities shown to counters)

3. **Record actual counts** — enter physical counts per location/item
4. **Review variance** — system highlights discrepancies > tolerance threshold
5. **Approve adjustments** — manager approves; stock adjusted automatically
6. **Close count** — marks count cycle as complete

Best Practices

- Schedule ABC analysis — count A-items (high value/fast-moving) monthly, B quarterly, C annually
- Use blind count sheets — do not show expected quantities to counters
- Require two-counter verification for high-value items
- Investigate variances > $\pm 2\%$ before approving adjustment

7. Shelf Life Management

Route: </dashboard/inventory/shelf-life>

What it does

Tracks expiry dates for perishable raw materials and finished goods. Flags stock approaching expiry for action.

Shelf life dashboard — items expiring within 30/60/90 days.

Alert thresholds: Configurable per item — default: RED (0–30 days), AMBER (31–60 days), GREEN (>60 days)

Required: Items must have `shelf_life_tracked = true` in product master and expiry date entered at receipt.

8. Warehouses

Route: `/dashboard/warehouses`

Required permission: `warehouses.view`

What it does

Configure physical warehouses — location, type, capacity. Parent container for WMS zones and bin locations.

Warehouses list with name, location, type, and capacity.

Adding a Warehouse

Click **+ Add Warehouse**:

Field	Required	Notes
Name	Yes	e.g. "Main Warehouse Nairobi"
Code	Yes	Short code e.g. "NBO-MAIN"
Type	Yes	Raw Material / Finished Goods / Bonded / Cold Chain
Address	Yes	Physical address
Capacity (m ²)	No	Floor area
Manager	No	Assigned warehouse manager
Is Active	Yes	Default true

9. WMS (Warehouse Management System)

Route: `/dashboard/wms`

Required permission: `wms.view`

What it does

Fine-grained warehouse management — define zones and bin locations within warehouses, manage pick waves, handle quarantine stock.

Tabs

Tab	Purpose
Zones	Warehouse zones (areas within warehouse)
Locations	Individual bin locations within zones
Handling Units	Pallets, cases, and containerization
Pick Waves	Batch pick operations for outbound
Quarantine	Segregated hold area for suspect stock

Zones Tab

Zones list — named areas within a warehouse (e.g. Receiving, Bulk Storage, Picking Face).

Creating a Zone:

Field	Required	Notes
Warehouse	Yes	Parent warehouse
Zone Name	Yes	e.g. "Bulk Storage A"
Zone Code	Yes	e.g. "BULK-A"
Zone Type	Yes	Receiving / Storage / Picking / Dispatch / Quarantine
Temperature Range	No	For cold chain zones

Locations Tab

Individual bin locations — row, aisle, level, bin identifiers.

Creating a Location:

Location code convention: [Zone] - [Row][Aisle][Level][Bin] e.g. "BULK-A-A01-01"

Handling Units Tab

Pallets and cases — track mixed-SKU handling units through the warehouse.

Pick Waves Tab

Pick waves — batch multiple pick orders into a single wave for efficiency.

Pick wave workflow:

1. Select pending pick orders (from sales orders or work orders)
2. Click **Create Wave** — system generates optimized pick sequence by location
3. Assign pickers
4. Confirm picks — updates inventory in real-time
5. Complete wave — triggers dispatch or production release

Quarantine Tab

Quarantine — hold stock pending QC clearance or investigation.

Quarantine stock:

Enter item, quantity, reason code, and reference. Stock moves to quarantine location and cannot be allocated until released.

10. Logistics

Route: `/dashboard/logistics`

What it does

Inbound and outbound shipment tracking, container management, fleet management, and import document control.

Tabs

Tab	Purpose
Overview	Logistics KPI dashboard
Shipments	All shipments (inbound and outbound)
Containers	Container tracking
Arrivals	Expected arrival schedule
Documents	Import/export documents
Fleet	Company-owned delivery fleet

Logistics overview — shipments in transit, arriving today, and pending clearance.

All shipments with origin, destination, carrier, ETA, and status.

Container tracking — container number, contents, port status, and clearance.

Arrival schedule — expected delivery date, supplier, PO reference.

Import documents — Bill of Lading, Commercial Invoice, Packing List, Certificate of Origin, Customs Declaration.

Fleet management — company vehicles, driver assignments, maintenance schedule.

11. Common Mistakes & Troubleshooting

Problem	Cause	Fix
PR approval stuck	Approver not configured for department	Check Admin → Approvals for department approval chain
PO can't be sent	Supplier has no email	Add supplier email in Suppliers module
GRN won't post	Item not in inventory master	Ensure item exists in Products or Materials master
Stock count variance not clearing	Count not yet approved	Manager must approve variance in Cycle Count module
Reorder suggestions not generating	No reorder policy for item	Create reorder policy in Procurement → Reorder Policies
Shelf life alerts not showing	Item not set as shelf-life tracked	Enable in product master: <code>shelf_life_tracked = true</code>
Location not available in transfer	Location is inactive	Activate location in WMS → Locations

12. Related Modules

This Action	Connects To
Goods receipt from PO	Inventory → Stock (increase) + Finance → AP Invoice matching
Reorder suggestion	Procurement → Purchase Requisition
MRP recommendation	Procurement → Purchase Requisition
Production material issue	Inventory → Movements (consumption)
Quarantine release	Quality → QC Inspection decision
Outbound shipment	Sales → Delivery confirmation
