 4. Knowledge Base
 5. Communication
 6. Helpdesk
 7. Approvals
 8. System Logs
 9. Security Logs
 10. Common Mistakes & Troubleshooting
 11. Related Modules
-

1. Module Overview

What it does: Central document management — store, version, and share business documents. Internal communications, helpdesk ticketing, approval workflow management, and audit log review.

Who uses it:

- All staff — access documents, raise helpdesk tickets, submit approvals
- Administrators — manage document library, configure approvals
- Managers — approve requests and review audit logs

- Knowledge Officers — maintain knowledge base and SOPs

Modules at a glance:

Feature	Route	Purpose
Documents	/dashboard/documents	Document library
Communication	/dashboard/communication	Internal messaging
Helpdesk	/dashboard/helpdesk	IT and support tickets
Approvals	/dashboard/approvals	Pending approval queue
Logs	/dashboard/logs	System audit trail

2. Documents Module

Route: </dashboard/documents>

Documents module — document library and compliance documents.

What it does

Store, version control, and share business documents — contracts, SOPs, certifications, policies, and reports.

Tabs

Tab	Purpose
Library	General document library
Compliance	Compliance-specific documents
Knowledge Base	SOPs and how-to articles

Document Library

Uploading a Document:

1. Documents → Library → + **Upload Document**
2. Select file (PDF, Word, Excel, image)
3. Set:

Field	Required	Notes
Title	Yes	Descriptive name
Category	Yes	Contract / Policy / SOP / Certificate / Report / Other
Department	No	Owning department
Tags	No	Searchable keywords
Version	No	e.g. "v2.1"
Expiry Date	No	For time-limited documents
Access Level	Yes	Public / Department / Restricted
Notes	No	Description

Version Control:

- Upload new version → previous version archived automatically
- All versions retained; version history viewable on document detail
- Cannot delete a document if it is referenced by another record

Document Access Levels:

Tab: Compliance

Stores compliance-critical documents — regulatory licenses, permits, certifications, audit reports, and quality standards.

- Document type: License / Permit / Certificate / Audit Report / Standard
- Issuing authority
- Reference number
- Issue date and expiry date
- Applicable product/facility

- Status: Valid / Expiring Soon / Expired

Expiry alerts: System sends email alerts 30 and 7 days before expiry to document owner and compliance manager.

4. Knowledge Base

Tab: Knowledge Base · **Route:** `/dashboard/documents/knowledge-base`

Knowledge base — SOPs, training guides, FAQs, and how-to articles.

What it does

Searchable internal knowledge repository — standard operating procedures, training materials, troubleshooting guides, and FAQs.

Article types: SOP / Work Instruction / Policy / FAQ / Training Guide / Troubleshooting

Creating a Knowledge Article:

1. Knowledge Base → **+ New Article**
2. Write in rich-text editor (supports headers, tables, images, links)
3. Set category, tags, and audience
4. Publish — immediately searchable

Search: Full-text search across all article titles, content, and tags. Results ranked by relevance.

Article versioning: Updates create a new version. Previous versions retained for audit trail.

5. Communication

Route: `/dashboard/communication`

Internal communication hub — announcements, messaging, and notifications.

What it does

Internal messaging and announcements — system-wide broadcasts, department notices, and individual messages.

Communication types:

- **System Announcement** — broadcasts to all users (admin only)
- **Department Notice** — visible to a specific department
- **Direct Message** — user-to-user messaging

Creating an Announcement:

1. Communication → **+ New Announcement**
2. Set title, message body (rich text)
3. Select audience: All Users / Department / Role
4. Set expiry date (announcement disappears from feed after this date)

5. Post — users see it in their notification feed

6. Helpdesk

Route: `/dashboard/helpdesk`

Helpdesk — support ticket queue with status, priority, and SLA tracking.

What it does

Internal IT and operational support ticketing — log issues, track resolution, SLA monitoring.

Raising a Ticket:

1. Helpdesk → **+ New Ticket**
2. Set:

Field	Required	Notes
Title	Yes	Brief description of issue
Category	Yes	IT / Finance / HR / Operations / Other
Priority	Yes	Low / Normal / High / Critical
Description	Yes	Full details
Attachment	No	Screenshot or file
Related Module	No	Which ERP module is affected

Ticket Status Flow: OPEN → ASSIGNED → IN_PROGRESS → RESOLVED → CLOSED

SLA targets:

Priority	First Response	Resolution
Critical	1 hour	4 hours
High	4 hours	24 hours
Normal	1 business day	3 business days
Low	3 business days	1 week

Viewing your tickets: Helpdesk → My Tickets tab shows all tickets you raised.

7. Approvals

Route: /dashboard/approvals

Approvals queue — pending approval requests from all modules.

What it does

Central approval inbox — all approval requests routed here regardless of originating module (Purchase Orders, Leave, Payroll, Journals, etc.).

Approval types that appear here:

- Purchase Requisition approval
- Purchase Order approval
- Leave request
- Expense claim
- Journal entry
- Payroll approval
- Credit note approval
- Vendor payment

Approving a Request:

1. Approvals → click pending request
2. Review details (full document shown)
3. Click **Approve** or **Reject**
4. Add rejection reason (required if rejecting)
5. Requestor notified automatically

Delegation: If you are away, delegate approvals to a colleague in Settings → Approval Delegation.

Approval chains: Multi-level approvals configured per document type (e.g. PO > KES 500,000 requires Finance Director approval after Procurement Manager). Configured in Admin → Approvals.

8. System Logs

Route: `/dashboard/logs`

System audit log — all user actions with timestamp, user, action type, and affected record.

What it does

Complete audit trail of all system actions — who did what, when, and to which record.

Log entry fields:

- Timestamp (date and time)
- User
- Action (Create / Update / Delete / Login / Export)
- Module
- Record ID
- Previous Value (for updates)
- New Value (for updates)

- IP Address

Filtering logs:

- By date range
- By user
- By action type
- By module

Export: Logs can be exported to CSV for external audit.

Common log queries

Query	Filter settings
All deletes this week	Action = DELETE, Date = last 7 days
User login history	Action = LOGIN, User = [select user]
Invoice changes	Module = Sales, Action = UPDATE
Who approved this PO	Module = Procurement, Action = APPROVE, Record ID = [PO number]

9. Security Logs

Route: `/dashboard/logs/security`

Security event log — failed logins, password changes, permission changes, and suspicious activity.

What it does

Security-focused audit events:

- Failed login attempts (shows username and IP)
- Successful logins (with IP and device)
- Password reset events
- Permission changes (who granted/revoked what)
- Account lockouts
- Bulk export events
- API key creation/revocation

Alert thresholds: 5 failed logins from same IP triggers admin alert. Configurable in Admin → Security.

10. Common Mistakes & Troubleshooting

Problem	Cause	Fix
Document not visible	Access level set to Restricted	Request access from document owner or admin
Approval not appearing in queue	Approval chain misconfigured	Admin → Approvals → check chain for that document type
Helpdesk ticket stuck at OPEN	No support agent assigned	Admin assigns ticket in Helpdesk admin view
Knowledge base article not found	Tags not set	Edit article and add relevant tags
Compliance doc showing as expired	Renewal not uploaded	Upload new certificate and update expiry date
Log export blocked	Export permission not granted	Admin → Roles → enable <code>logs.export</code> permission

11. Related Modules

This Action	Connects To
PR/PO submitted	Approvals queue → Procurement Manager
Leave submitted	Approvals queue → Line Manager
QMS document	Quality → QMS tab (linked)
Regulatory certificate	Compliance → Regulatory Certs
Security log anomaly	Admin → Users (investigate account)
Helpdesk ticket resolved	Communication → notification to requestor
