1. Module Overview

What it does: Manages inbound and outbound logistics — shipment tracking, container management, customs documentation, and fleet operations. Bridges the gap between supplier POs arriving from overseas and warehouse receipt.

Who uses it:

- Logistics Coordinator — tracks shipments, raises customs documentation
- Import Officer — manages container clearance, document filing
- Fleet Manager — manages delivery vehicles and driver assignments
- Supply Chain Manager — monitors supply chain lead times and transit KPIs

When to use it:

- When tracking an incoming container from overseas
- When scheduling a delivery run for customer orders
- When managing customs clearance documentation
- When monitoring fleet vehicle maintenance schedules
- When recording actual vs. expected arrival times

Module route: `/dashboard/logistics`

Logistics overview dashboard — shipments in transit, due today, and pending clearance.

2. Logistics Overview Dashboard

Tab: Overview

KPI Cards

KPI	Description
Shipments In Transit	Count of active inbound and outbound shipments
Arriving Today	Shipments with ETA = today
Pending Customs Clearance	Containers at port awaiting clearance
Late Shipments	Arrivals past their ETA
Fleet Vehicles Active	Number of company vehicles currently deployed
Documents Due	Import/export documents due for filing

Charts

- Transit time trend (actual vs. planned by supplier/lane)
- Freight cost by carrier and period
- On-time delivery rate (outbound)

3. Shipments

Tab: Shipments

What it does

Track all inbound shipments (from suppliers) and outbound shipments (to customers). Each shipment links to purchase orders (inbound) or sales orders (outbound).

Shipments list — all active and recent shipments with mode, carrier, ETA, and status.

Shipment Fields

Field	Required	Notes
Shipment Reference	Yes	Auto-generated or manual reference
Direction	Yes	Inbound / Outbound
Mode	Yes	Sea / Air / Road / Rail
Origin	Yes	Country and city of departure
Destination	Yes	Country and city of arrival
Carrier	Yes	Shipping line, airline, or road haulier
Vessel/Flight/Vehicle	No	Vessel name, flight number, or truck plate
Bill of Lading / AWB	No	Transport document reference
Departure Date	Yes	Actual or estimated departure
ETA	Yes	Estimated arrival at destination
ATA	No	Actual time of arrival (filled when received)
Related POs	No	Link to purchase order(s)
Related Sales Orders	No	Link to sales order(s)
Incoterm	No	EXW / FOB / CIF / DAP / DDP
Carrier Reference	No	Carrier booking number
Status	Yes	See status values below

Shipment Status Values

Status	Meaning
BOOKING_CONFIRMED	Space confirmed with carrier
IN_TRANSIT	Cargo departed; en route
AT_TRANSSHIPMENT	In transit via intermediate port
AT_DESTINATION_PORT	Arrived at destination port
CUSTOMS_CLEARANCE	Under customs examination
CLEARED	Customs cleared
OUT_FOR_DELIVERY	Last-mile delivery in progress
DELIVERED	Goods received at warehouse

Creating a Shipment

1. Logistics → Shipments → **+ New Shipment**
2. Set direction (Inbound/Outbound)
3. Enter carrier, route, ETA
4. Link to purchase orders (for inbound) or sales orders (for outbound)
5. Attach transport documents
6. Save and track status updates as shipment progresses

4. Container Tracking

Tab: Containers

What it does

Detailed container-level tracking — container numbers, seal numbers, contents summary, port status, and clearance milestones.

Container tracking — container number, shipping line, port status, and clearance milestone.

Container Fields

Field	Required	Notes
Container Number	Yes	ISO standard format e.g. MSCU1234567
Container Type	Yes	20GP / 40GP / 40HC / Reefer
Seal Number	Yes	Security seal (from shipping line or customs)
Shipment	Yes	Parent shipment reference
Loading Port	Yes	Port of origin
Discharge Port	Yes	Port of destination
Contents Summary	No	Brief description for customs
Gross Weight (kg)	No	Total cargo weight
Net Weight (kg)	No	Net payload weight
Volume (CBM)	No	Cubic meter measurement
Container Status	Yes	See container milestones below

Container Milestone Tracking

Track each stage:

1. Empty container collected from depot

2. Stuffed (loaded) at origin
3. Gate-in at port
4. Loaded on vessel
5. Departed origin port
6. Arrived transshipment port
7. Departed transshipment port
8. Arrived destination port (discharge)
9. Customs examination / clearance
10. Gate-out from port (release)
11. Transported to warehouse
12. Unstuffed (unloaded) at warehouse
13. Empty returned to shipping line

5. Arrival Schedule

Tab: Arrivals

What it does

Rolling schedule of expected inbound deliveries — by date, origin, supplier, and PO reference. Used by warehouse to plan receiving resources.

Arrival schedule — expected delivery date, supplier, PO reference, and quantity.

Arrival schedule view shows:

- Expected arrival date (ETA)
- Supplier name
- PO reference number
- Items and quantities
- Carrier and transport reference
- Status (On Time / Delayed / Arrived)

Warehouse planning: Receiving supervisor views arrival schedule daily to pre-allocate receiving bays, staff, and equipment.

6. Import/Export Documents

Tab: Documents

What it does

Central repository for all import and export trade documents — Bill of Lading, Commercial Invoice, Packing List, Certificate of Origin, Customs Declaration, and Phytosanitary Certificates.

Import documents — document type, shipment reference, status, and file attachment.

Required Import Documents for Kenya

Document	Issued By	Required For
Bill of Lading (OBL)	Shipping Line	All sea freight
Commercial Invoice	Supplier	Customs valuation
Packing List	Supplier	Customs examination
Certificate of Origin	Chamber of Commerce	Duty preferential rates
Phytosanitary Certificate	Origin Country Dept.	Food/agricultural goods
Conformity Certificate (CoC)	PVOC Agency	Regulated goods (KEBS)
Food Import Permit	KEPHIS/KRA	Food products
Health Certificate	Origin country health authority	Animal products
Import Declaration Form (IDF)	KRA iCMS	All imports

Document Upload Process

1. Logistics → Documents → **+ Add Document**
2. Set document type, shipment reference, supplier, and date issued
3. Upload file (PDF, scan)
4. Mark as Required: Yes/No
5. Set review status: Received / Pending / Missing

Customs clearance cannot proceed until all required documents are marked Received.

Document Status Tracking

Status	Meaning
PENDING	Not yet received
RECEIVED	Original or certified copy received
QUERIED	Customs or bank raised a query
ACCEPTED	Accepted by customs/bank
REJECTED	Rejected — resubmission required

7. Fleet Management

Tab: Fleet

What it does

Manage company-owned delivery vehicles — vehicle register, driver assignments, maintenance scheduling, fuel tracking, and route assignment.

Fleet management — all vehicles with status, assigned driver, and last service date.

Vehicle Register Fields

Field	Required	Notes
Vehicle Name	Yes	e.g. "KBX 001T — Isuzu NQR"
Registration Number	Yes	Kenyan number plate
Vehicle Type	Yes	Pickup / 3-Ton / 10-Ton / Refrigerated / Tanker
Capacity (kg)	Yes	Max payload
Driver	No	Assigned driver (link to HR employee)
Year of Manufacture	No	
Insurance Expiry	Yes	Alert when expiring
Inspection (NTSA) Expiry	Yes	Alert when expiring
Status	Yes	Active / Under Maintenance / Disposed
Fuel Type	Yes	Diesel / Petrol / Electric

Fleet Maintenance Alerts

System alerts for:

- Insurance expiring within 30 days
- NTSA inspection due within 14 days
- Scheduled service due (based on mileage or calendar interval)

Fuel Tracking

Log fuel fill-ups: date, vehicle, litres, cost per litre, odometer reading.

Report: fuel efficiency (km per litre) per vehicle.

Route Assignment

When sales orders are dispatched, assign vehicle and driver to delivery:

1. Sales → Orders → Dispatch → select vehicle from fleet
2. Vehicle appears on delivery schedule for that date

8. Outbound Logistics (Sales Delivery)

What it does

Tracks the outbound journey of customer orders from warehouse dispatch to delivery confirmation.

Outbound workflow:

1. **Sales order confirmed** → WMS pick wave created
2. **Picking completed** → goods staged at dispatch bay
3. **Load vehicle** → assign vehicle and driver (Fleet)
4. **Dispatch** → Shipment created (type: Outbound), status: OUT_FOR_DELIVERY
5. **Driver delivers** → customer signs delivery note (paper or electronic)
6. **Office confirms delivery** → Shipment status = DELIVERED
7. **System triggers** → Sales order status = DELIVERED → Invoice generation prompt

Proof of Delivery (POD)

Record POD reference number and received-by name when confirming delivery. Attach scanned copy if available.

OTIF Tracking

OTIF = On Time In Full

- On Time: Delivered on or before promised delivery date
- In Full: Delivered quantity = ordered quantity

Target: >95% OTIF. Monthly OTIF report available in Analytics → Sales.

9. Common Mistakes & Troubleshooting

Problem	Cause	Fix
Shipment not linked to PO	PO not selected when creating shipment	Edit shipment → add PO reference
Container not clearing customs	Required document missing	Upload missing document in Documents tab; mark as Received
Arrival date wrong	ETA not updated	Update ETA on shipment when new sailing advice received
Fleet vehicle not available	Status = Under Maintenance	Update vehicle status when maintenance complete
Delivery not triggering invoice	Sales order not marked DELIVERED	Confirm delivery on the shipment record
Customs duty calculation wrong	Commercial invoice value incorrect	Liaise with supplier for correct value; update document

10. Related Modules

This Action	Connects To
Inbound shipment arrives	Procurement → Deliveries (GRN)
Container cleared	Procurement → Goods Receipt
Outbound dispatch	Sales → Delivery Confirmation
Fleet maintenance due	Maintenance → Work Order
Import documents	Finance → Landed Cost (duty allocation)
OTIF metrics	Analytics → Supply Chain
Driver expense (fuel/tolls)	Finance → Expenses
