1. Module Overview

What it does: Manages the complete order-to-cash cycle — from customer quotation through delivery, invoicing, and payment collection. Includes pricing management, van sales, distributor management, and POS.

Who uses it:

- Sales Manager — monitors KPIs, manages pricing and targets
- Sales Rep — creates quotations and orders for customers
- Accounts Receivable — manages invoices, collections, and reconciliation
- Distribution Manager — tracks deliveries and van sales
- Van Sales Agent — loads stock and captures orders on-the-go

When to use it:

- When creating a sales order for a customer
- When issuing a customer invoice
- When tracking outstanding receivables
- When setting prices or promotional pricing
- When processing a return or credit note

Modules at a glance:

Feature	Route	Purpose
Sales Hub	/dashboard/sales	Full sales workspace
POS	/dashboard/pos	Point of sale terminal

Sales module overview showing KPIs: revenue, orders, collections, and outstanding.

2. Sales Overview Dashboard

Tab: Overview

KPI cards at top:

- Total Revenue (period)
- Orders Raised
- Outstanding Receivables
- Average Order Value
- Orders by Status (chart)
- Top Products (chart)
- Top Customers (chart)

Use the date range picker to change the reporting period.

3. Sales Orders

Tab: Orders

Required permission: `sales.orders.view`

What it does

Create, track, and manage customer sales orders from entry through dispatch confirmation.

Sales orders list with customer, order date, value, status, and delivery date.

Creating a Sales Order

Click + New Order:

Field	Required	Notes
Customer	Yes	Select from customer master
Order Date	Yes	Default today
Required Delivery Date	Yes	Customer's requested date
Delivery Address	Yes	Ship-to address (can differ from billing)
Payment Terms	Yes	Net terms from customer master (editable)
Price List	No	Override default price list
Currency	Yes	Transaction currency
Sales Rep	Yes	Assigned sales representative
Reference	No	Customer PO number

After filling header, add line items:

Line Field	Required	Notes
Product	Yes	Finished good SKU
Quantity	Yes	Ordered quantity
Unit	Yes	Sales UOM
Unit Price	Yes	Auto-filled from price list; editable
Discount %	No	Line-level discount
VAT Code	Yes	Tax rate for this line

Order Status Flow: DRAFT → CONFIRMED → PICKING → DISPATCHED → DELIVERED → INVOICED → CLOSED

Dropdowns on order:

The screenshot displays the POJU ERP Order form. It includes fields for Order No, Customer (with a 'Select customer...' dropdown), Order Date (05/19/2026), Requested Delivery (mm/dd/yyyy), Warehouse (optional, set to 'No warehouse'), and Currency (a list including USD, EUR, GBP, JPY, CNY, and SGD). There is a Notes section and an Order Lines section with a '+ Add Line' button. The first line item shows a 'Select product...' dropdown, a Qty field (0), and a unit dropdown menu with options: PCS, BOX, CARTON, PALLET, KG, and L. At the bottom, there are two more input fields, both containing '0'.

Payment terms, currency, price list, and sales rep dropdowns.

Required Data Before Creating Orders

- Customer exists in Customers master with billing and delivery address
- Products exist with active price list entry or unit price configured
- Payment terms configured

4. Customer Quotations

Tab: Quotes

What it does

Create price quotations for customers. Quote can be converted to a sales order upon customer acceptance.

Quotations list with customer, expiry date, value, and status.

Quote Status Flow: DRAFT → SENT → ACCEPTED → CONVERTED_TO_ORDER or EXPIRED or REJECTED

Converting a quote: Open quote → click **Convert to Order** → all lines transferred; quote status set to CONVERTED.

Quote Validity

Set **Expiry Date** on the quote — after this date, quote status automatically moves to EXPIRED. Customer cannot accept an expired quote; rep must create a new quote.

5. Invoicing

Tab: Invoices

What it does

Customer invoices — generated from sales orders upon delivery confirmation, or created manually.

Invoices list with customer, invoice date, due date, amount, and payment status.

Invoice Status: DRAFT → POSTED → PARTIALLY_PAID → PAID → VOID

Creating an Invoice

From a sales order: click **Create Invoice** button on the order detail page. Invoice pre-filled with order lines.

Manual invoice: + **New Invoice** on Invoices tab.

Invoice Fields

Field	Required	Notes
Customer	Yes	Billing customer
Invoice Date	Yes	Accounting date
Due Date	Yes	Payment deadline (auto from payment terms)
Sales Order	No	Reference order
Lines	Yes	Products, qty, price, VAT

eTIMS Integration

For Kenyan tax compliance, posted invoices are submitted to KRA eTIMS. Status shown on invoice: **eTIMS: PENDING / SUBMITTED / ACCEPTED / REJECTED** . See Finance → eTIMS tab for submission log.

6. Delivery & Shipments

Tabs: Shipments · Delivery

What it does

Track outbound delivery status from warehouse dispatch to customer receipt.

Shipments — all outbound dispatch records with carrier, tracking, and status.

Delivery confirmation — mark deliveries as confirmed and record proof of delivery.

Delivery confirmation workflow:

1. Dispatch creates shipment record
2. Driver delivers and obtains customer signature
3. Office updates delivery status to DELIVERED
4. System triggers invoice creation (if not already created)

7. Collections & Receivables

Tab: Collections

What it does

Record customer payments against invoices. Track outstanding balances. Manage credit limits.

Collections register — payments received, allocation to invoices, outstanding balances.

Payment allocation workflow:

1. Customer makes payment (bank transfer, cheque, M-Pesa)
2. Open Collections → **+ New Collection**
3. Select customer and enter amount received
4. Allocate to specific invoices
5. Save — invoice status updates to PARTIALLY_PAID or PAID

M-Pesa payments: Reconcile via Finance → M-Pesa tab (automatic matching for payments above KES 1,000 if reference matches).

8. Returns

Tab: Returns

What it does

Process customer returns — create return authorization, record returned goods, issue credit note.

Returns register — return requests, reason codes, and credit note status.

Return workflow:

1. Click + New Return
2. Reference original sales order
3. Select products being returned and quantities
4. Assign reason code (Damaged / Wrong Product / Expired / Customer Changed Mind)
5. Submit → Warehouse receives returned goods
6. QC inspects returns
7. Credit note issued → applied against customer balance

9. Pricing & Price Lists

Tabs: Pricing · Price Lists · Dynamic Pricing

What it does

Manage product pricing: standard price lists, promotional pricing, volume discounts, and dynamic pricing rules.

Pricing overview — active price lists and rules summary.

Price lists — customer segment-specific or channel-specific price books.

Creating a Pricing Rule:

New Pricing Rule

Pricing Level

STANDARD REGION DISTRIBUTOR CUSTOMER

Product ID *

Product UUID or SKU

Unit Price * Currency

KES

Min Quantity

0 = no minimum

Effective From Effective To

mm/dd/yyyy mm/dd/yyyy

Notes

Cancel Create Rule

Field	Required	Notes
Rule Name	Yes	Descriptive name
Price List	Yes	Applicable price list
Product	No	Leave blank for all products
Product Category	No	Category-level rule
Customer	No	Customer-specific price
Customer Group	No	Segment-level price
Min Quantity	No	Volume break trigger
Discount %	No	Percentage discount
Fixed Price	No	Override price (alternative to discount)
Valid From	Yes	Start date
Valid To	No	End date (blank = no expiry)

Dynamic pricing — time-based, season, or event-driven pricing adjustments.

Price List Priority

When multiple price lists apply: Customer-specific → Customer Group → Promotional → Standard. Most specific wins.

10. Sales Contracts & Recurring Orders

Tabs: Contracts · Recurring

What it does

Manage long-term customer supply agreements and auto-generate recurring orders on schedule.

Contracts — framework agreements with committed volumes and pricing.

Recurring orders — auto-schedule orders for subscriptions and regular customers.

Recurring order setup:

1. Create recurring order template
2. Set frequency: Daily / Weekly / Monthly / Quarterly
3. Set start date and end date (or open-ended)
4. System auto-creates orders on schedule
5. Orders require confirmation before dispatch

11. Van Sales

Tab: Van Sales

What it does

Manage pre-sell and cash van sales operations — van loading, route management, order capture, and end-of-day settlement.

Van sales management — active vans, load sheets, and route status.

Van Sales workflow:

1. **Van Loading** (`/dashboard/van-sales/vans/{id}`)
 - Open van record
 - Create load sheet — select products and quantities
 - Approve load → triggers warehouse pick
 - Van departs with physical stock
2. **Order Capture** (mobile or web)
 - Sales rep visits customer
 - Creates order against van stock
 - Cash or credit (within credit limit)
3. **End-of-Day Settlement**
 - Return unloaded stock
 - Reconcile cash collected

- Upload invoices
- System closes van route

12. Secondary Sales & Distributors

Tabs: Secondary · Distributors · Field Sales

What it does

Track secondary sell-through from distributors to retailers. Manage distributor performance and targets.

Secondary sales — distributor sell-through reporting and target vs. actual.

Distributor register — territory, credit limit, and performance metrics.

Field sales management — rep territory assignments and visit tracking.

13. Point of Sale (POS)

Route: `/dashboard/pos`

Required permission: `pos.view`

What it does

Direct retail selling terminal — scan or search products, apply promotions, process cash/card/M-Pesa payments, print receipts.

POS terminal with product search, basket, payment, and receipt.

POS workflow:

1. Open POS session (assigns cash drawer)
2. Scan or search product → adds to basket
3. Apply discount or promotion if applicable
4. Select payment method: Cash / Card / M-Pesa / Credit
5. Process payment
6. Print or email receipt
7. Close session at end of day → settlement report

POS requires:

- Product price configured in active price list
- POS session open by cashier
- M-Pesa integration configured (Finance → Integrations) for M-Pesa payments

14. Sales Reports

Tab: Reports · Margin

What it does

Sales performance analytics — revenue by product, customer, region, and period.
Margin analysis.

Sales reports — revenue trends, customer rankings, product performance.

Margin analysis — gross margin by product, customer, and order.

Commissions Tab:

Sales commissions — calculated per rep based on sales achieved vs. target.

15. Common Mistakes & Troubleshooting

Problem	Cause	Fix
Order won't confirm	Customer credit limit exceeded	Increase credit limit or require prepayment
Price not auto-filling	No active price list for this product/customer	Add product to price list or create customer-specific rule
Invoice not submitting to eTIMS	Missing customer KRA PIN	Add customer PIN in Customers master → Tax details
Delivery status stuck	Carrier not linked to shipment	Assign carrier and tracking number on shipment record
Return won't create credit note	Original invoice not POSTED	Invoice must be posted before return can generate credit note
M-Pesa payment not matching	Reference number mismatch	Manually match in Finance → M-Pesa → Unmatched tab
Van sales won't settle	Unconfirmed orders remain	Confirm or cancel all open orders before EOD settlement

16. Related Modules

This Action	Connects To
Sales order confirmed	Inventory → Pick Wave (WMS)
Invoice posted	Finance → Accounts Receivable
Payment collected	Finance → Bank Reconciliation
Return received	Inventory → Stock (increase) + Quality → Inspection
Van loading	Inventory → Stock Issue (van load)
eTIMS submission	Finance → Tax / eTIMS tab
Distributor order	CRM → Customer Account
